

For the support and further expansion of the research activities, Poulpharm is hiring a senior researcher with a large expertise in veterinary parasitological research.

WHO IS POULPHARM?

Over more than 10 years Poulpharm is a reliable, independent partner for veterinarians and the veterinary pharmaceutical and nutritional industry. Poulpharm's specialization lies in offering high quality level research activities, both at diagnostic level as in the execution of (pre)clinical trials in own test facilities. All activities are performed under strict procedures (ISO 17025, GMP, GLP). In the framework of parasitological research, Poulpharm can rely on a well-founded expertise, in both in vitro as in vivo studies.

RESPONSIBILITIES INCLUDE, BUT ARE NOT LIMITED TO, THE FOLLOWING:

- Active cooperation in the current research activities;
- New assay developments, optimizations and/or validation in the field of veterinary parasitology;
- Work with all species within the parasitology group and various internal (worms) and external animal parasites;
- Communicate with and assist the technicians;
- Training of technicians in the newest developments;
- Providing scientific support to the different business units (lab and CRO) in the field of parasitology;
- You will report to the R&D manager
- You will be located in Belgium, Hungary or Italy and will travel across the European region (10% of your time)

THE IDEAL CANDIDATE

- Ph.D. in a relevant discipline with 5+ years of research experience;
- Relevant supervisory/management experience;
- Experience in the implementation of clinical trials is a plus;
- Excellent written and verbal communication skills;
- Ability to work independently and as part of a team, self-motivation, adaptability and a positive attitude;
- Innovative mind-set and can-do mentality;
- Ability to learn new techniques, keep accurate records and perform multiple tasks simultaneously;
- Strong time management and organization skills
